

SaaS Expense Management

Unchecked SaaS spend and lack of centralization pose ongoing challenges for organizations. SIB empowers businesses by providing enhanced visibility, preventing unnecessary expenses.

Are You Overpaying for SaaS Expenses?

In today's fast-paced business environment, managing SaaS expenses can be a daunting task. According to [Gartner](#), Global SaaS spend is expected to grow by 17.9% in 2023 to \$197B. Companies often find themselves grappling with a range of challenges, including SaaS sprawl, unchecked spend, and lack of appropriate management tools. At SIB, we understand these pain points and have tailored our solutions to address them head-on.

Currently organizations face a number of challenges:

- > Visibility to SaaS spend decisions.
- > Lack of centralization for SaaS spend decision making.
- > Lack of controls and supporting workflows .
- > Lack of coordination across business units resulting in redundancies.
- > Compliance and security risks.

SIB Can Help

SIB's comprehensive SaaS expense management solution enables organizations to optimize costs, gain centralized control over SaaS spend, and streamline management processes for enhanced efficiency and cost savings.

- > **Start small and fast:** SIB offers a free proof of concept with a select group of the most widely used applications.
- > **Discover, manage, and optimize:** SIB empowers clients to regain control of their SaaS landscape through a single dashboard, accessing over 800+ SaaS environments with a 5 to 15-minute integration process per supplier.
- > **Methodology: On-going subscription-based engagement:** For long-term peace of mind, SIB offers an ongoing subscription-based managed service engagement. This collaborative, approach, focuses on prevention and maintaining visibility. We assist with ongoing optimization by constantly reviewing current spend and utilization trends while maintaining course correction through regular account reviews.
- > **Flexibility:** SIB is unique in that we can take on optimization and benchmarking projects on a standalone basis. That flexibility sets us apart. We can work on either a contingency or subscription model.
